Power BI Projects Delivered

Power BI Expenditure Dashboard – Gain Control Over Your Spending

The **Expenditure Dashboard** built in **Power BI** delivers a clear and interactive view of your organization's financial outflows, empowering better budget management.

Key Highlights:

Expense Analysis – Monitor and categorize spending across departments and projects

Trend Insights – Identify spending patterns over time with intuitive visualizations

Cost Optimization – Pinpoint areas for potential savings and operational efficiency

Dynamic Filters – Drill down by vendor, category, time period, or business unit

Ideal for finance teams seeking transparency, control, and smarter financial planning.

Power BI Revenue Dashboard – Visualize Growth, Drive Strategy

The **Revenue Dashboard** in **Power BI** provides a comprehensive view of your business's financial performance, enabling deeper insights and strategic decision-making.

Key Features:

 **Total Revenue & Growth Trends** – Track revenue over time with comparisons against targets

 **Revenue by Sector** – Break down revenue by category, such as Non-Tax, Tax, and Oil & Gas

 **Sector-wise Insights** – Visualize which sectors are driving income and where improvements are needed

 **Time-based Filters** – Analyze performance across customizable time periods

Perfect for executives, finance teams, and stakeholders seeking real-time clarity on revenue drivers.

🌐 Dashboard for The World Bank

This dashboard is developed using Tableau Desktop to analyze the economic health of 10 different countries over several financial years. 📊

It uses a combination of bar graphs, line charts, and map visuals to provide an interactive and insightful representation of global economic indicators.

📌 Key Features:

- 📊 Tracks GDP, inflation, and other key economic metrics across countries.
- 🗺️ Uses geographical maps for country-level analysis.
- 🔮 Includes future prediction capabilities powered by embedded CSV data.
- ⌚ Enables time-based filtering for multi-year comparisons.

This dashboard equips policymakers and analysts with a holistic view of economic trends and supports informed decision-making at a global level.

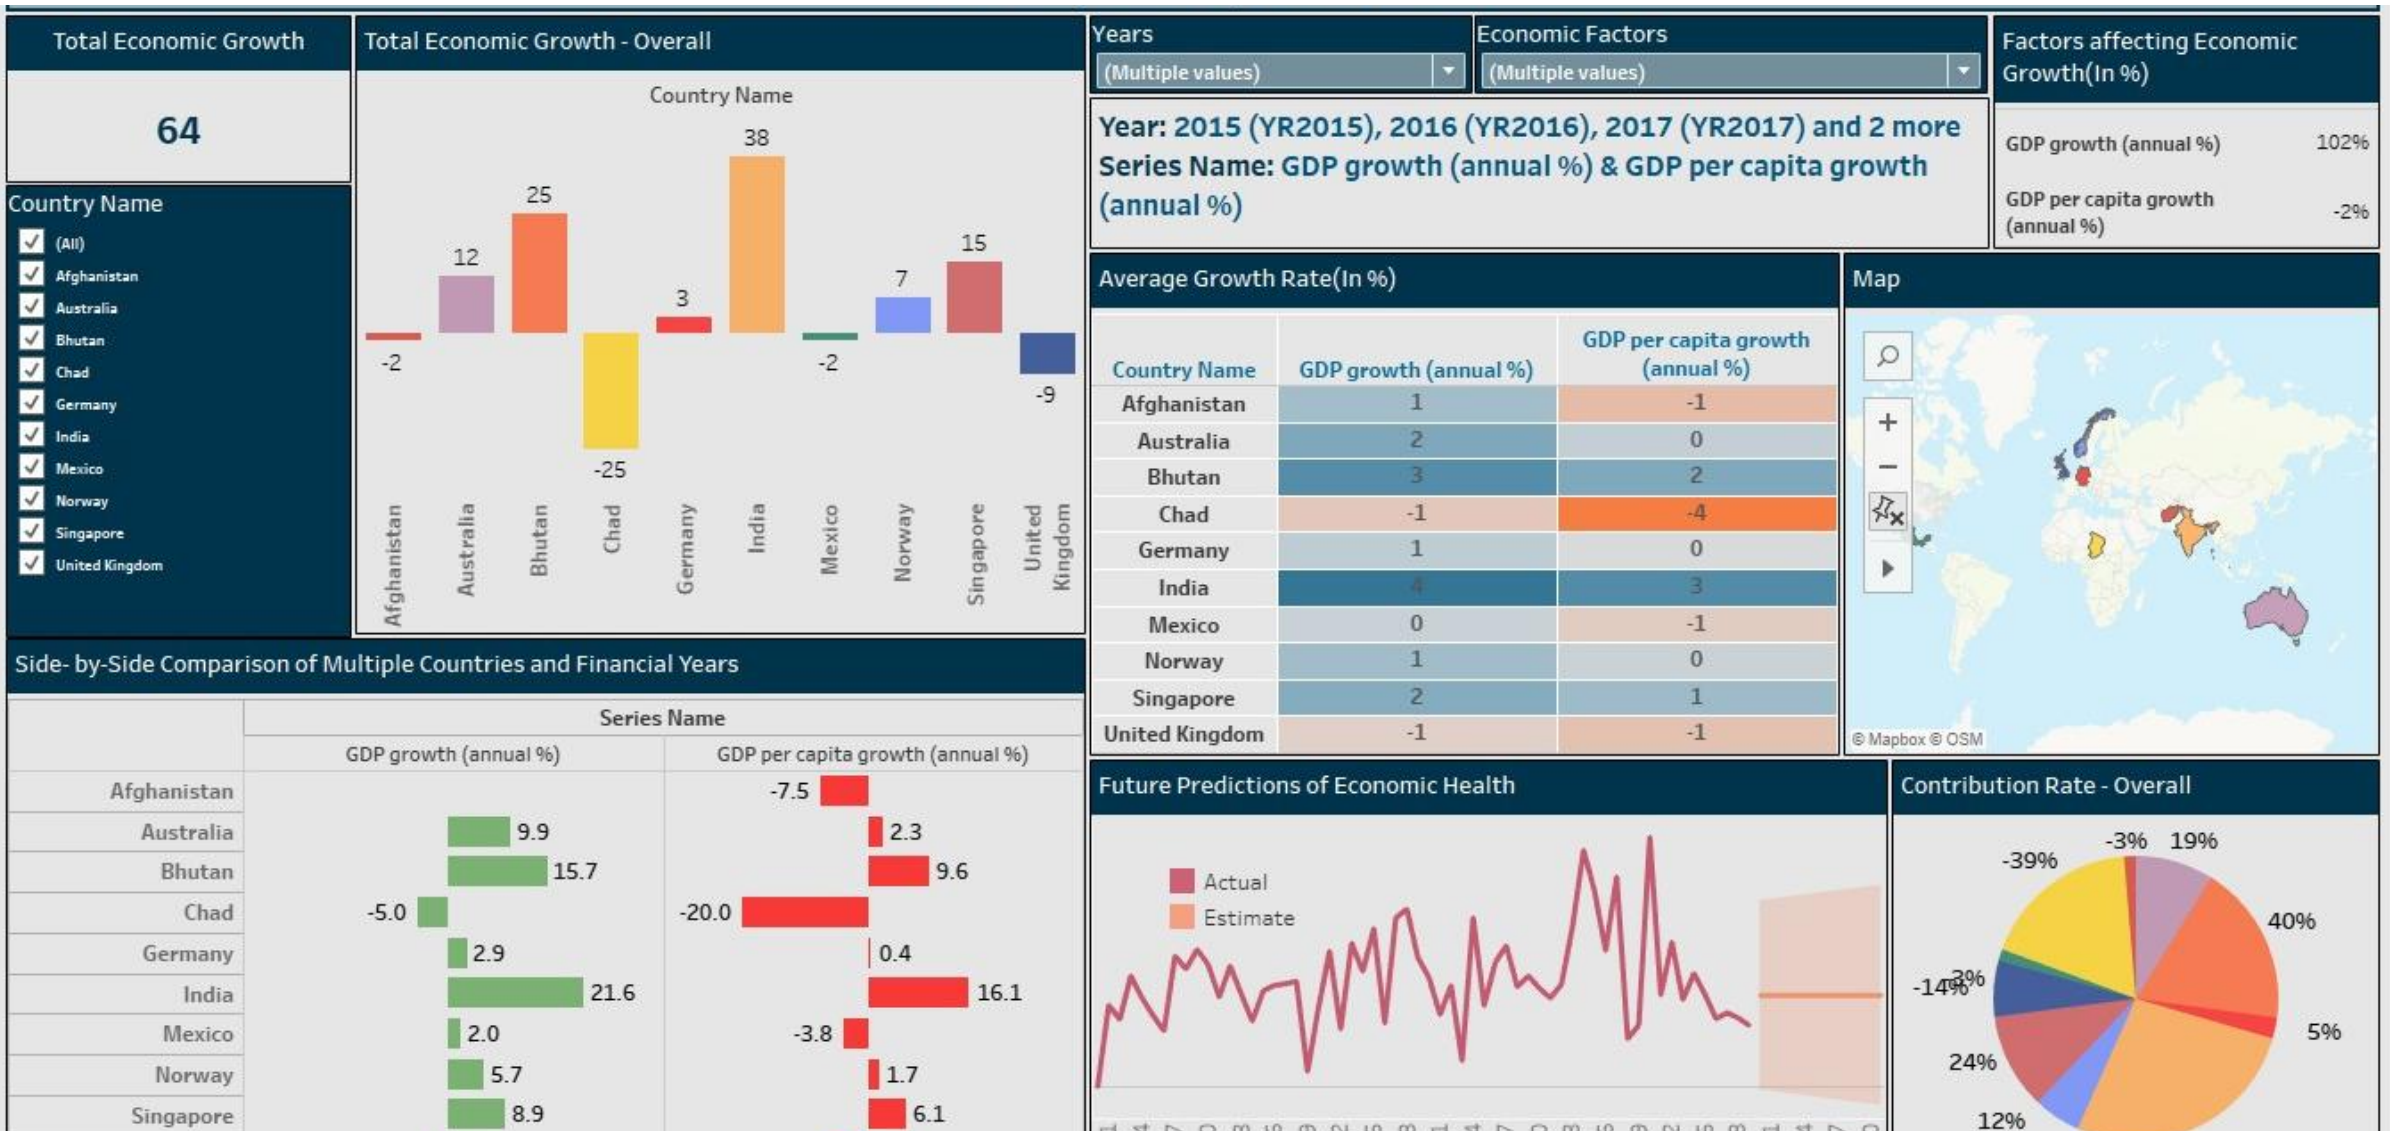

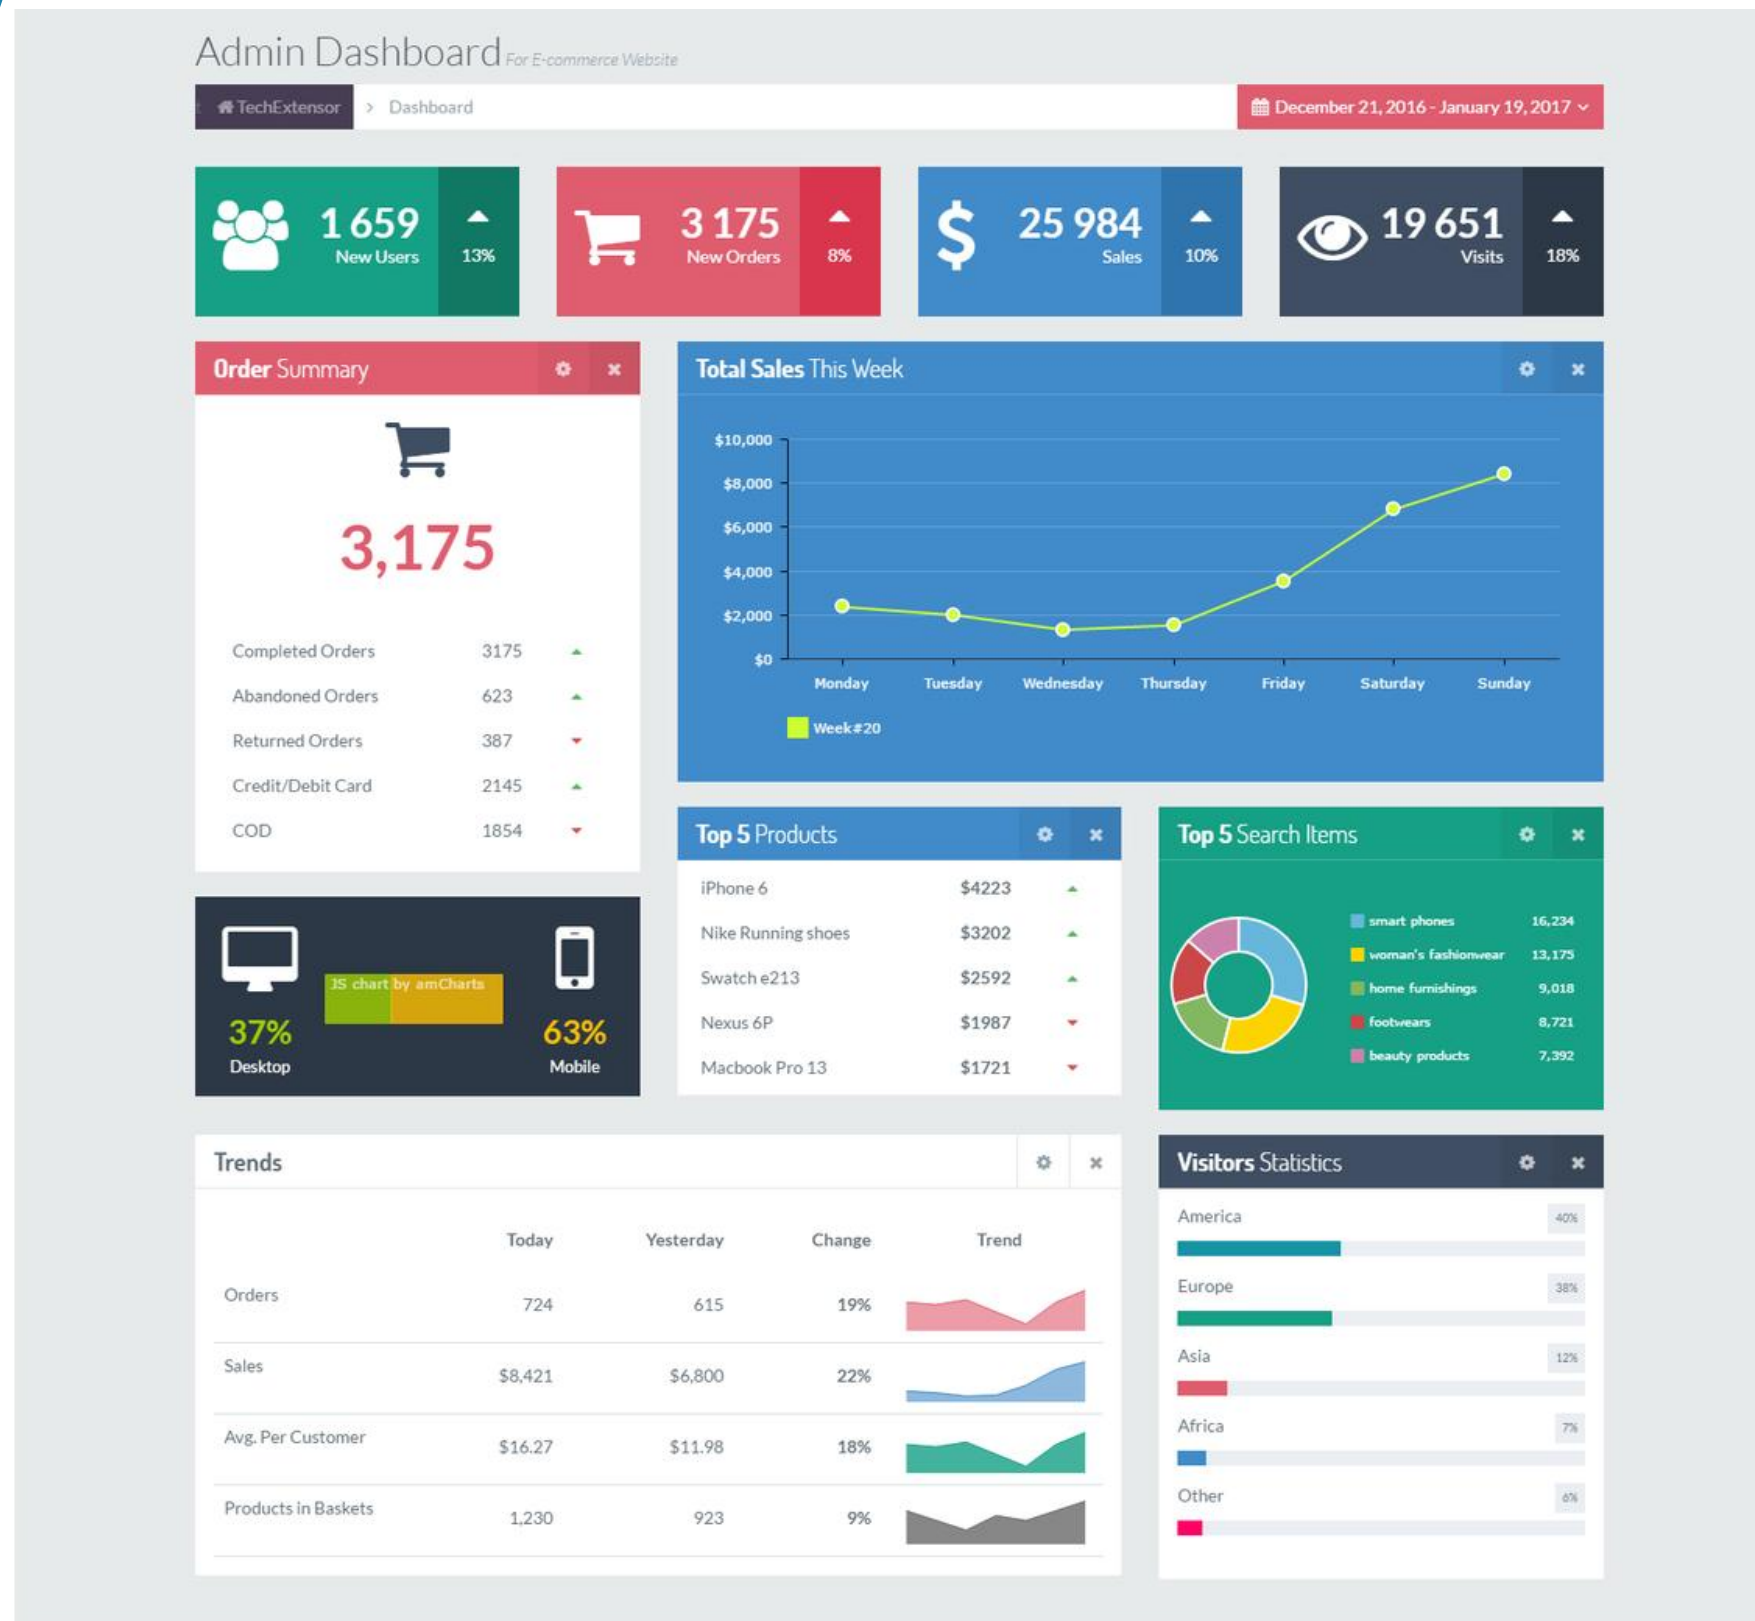

Tableau Projects Delivered

E-Commerce Admin Dashboard – Real-Time Business Insights

The E-Commerce Admin Dashboard built in Tableau offers a consolidated, real-time view of key performance indicators across an online retail platform.  

It showcases metrics like new users, orders, revenue trends, device usage, search behavior, and top-performing products — all in a single interactive interface.   

With geographic insights, trend comparisons, and dynamic charts, this dashboard empowers faster, data-driven decisions for improved business performance.   

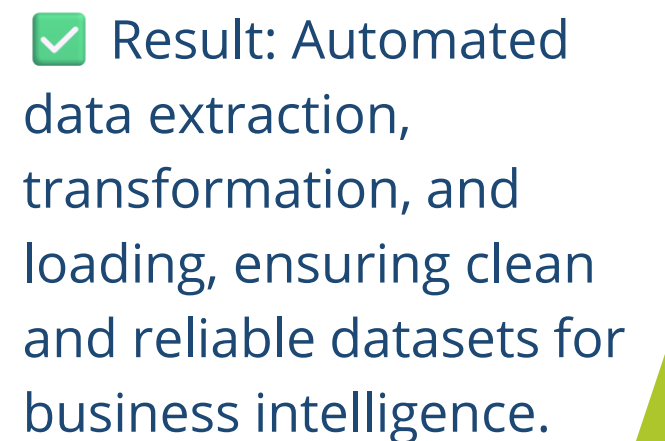

Key Features:

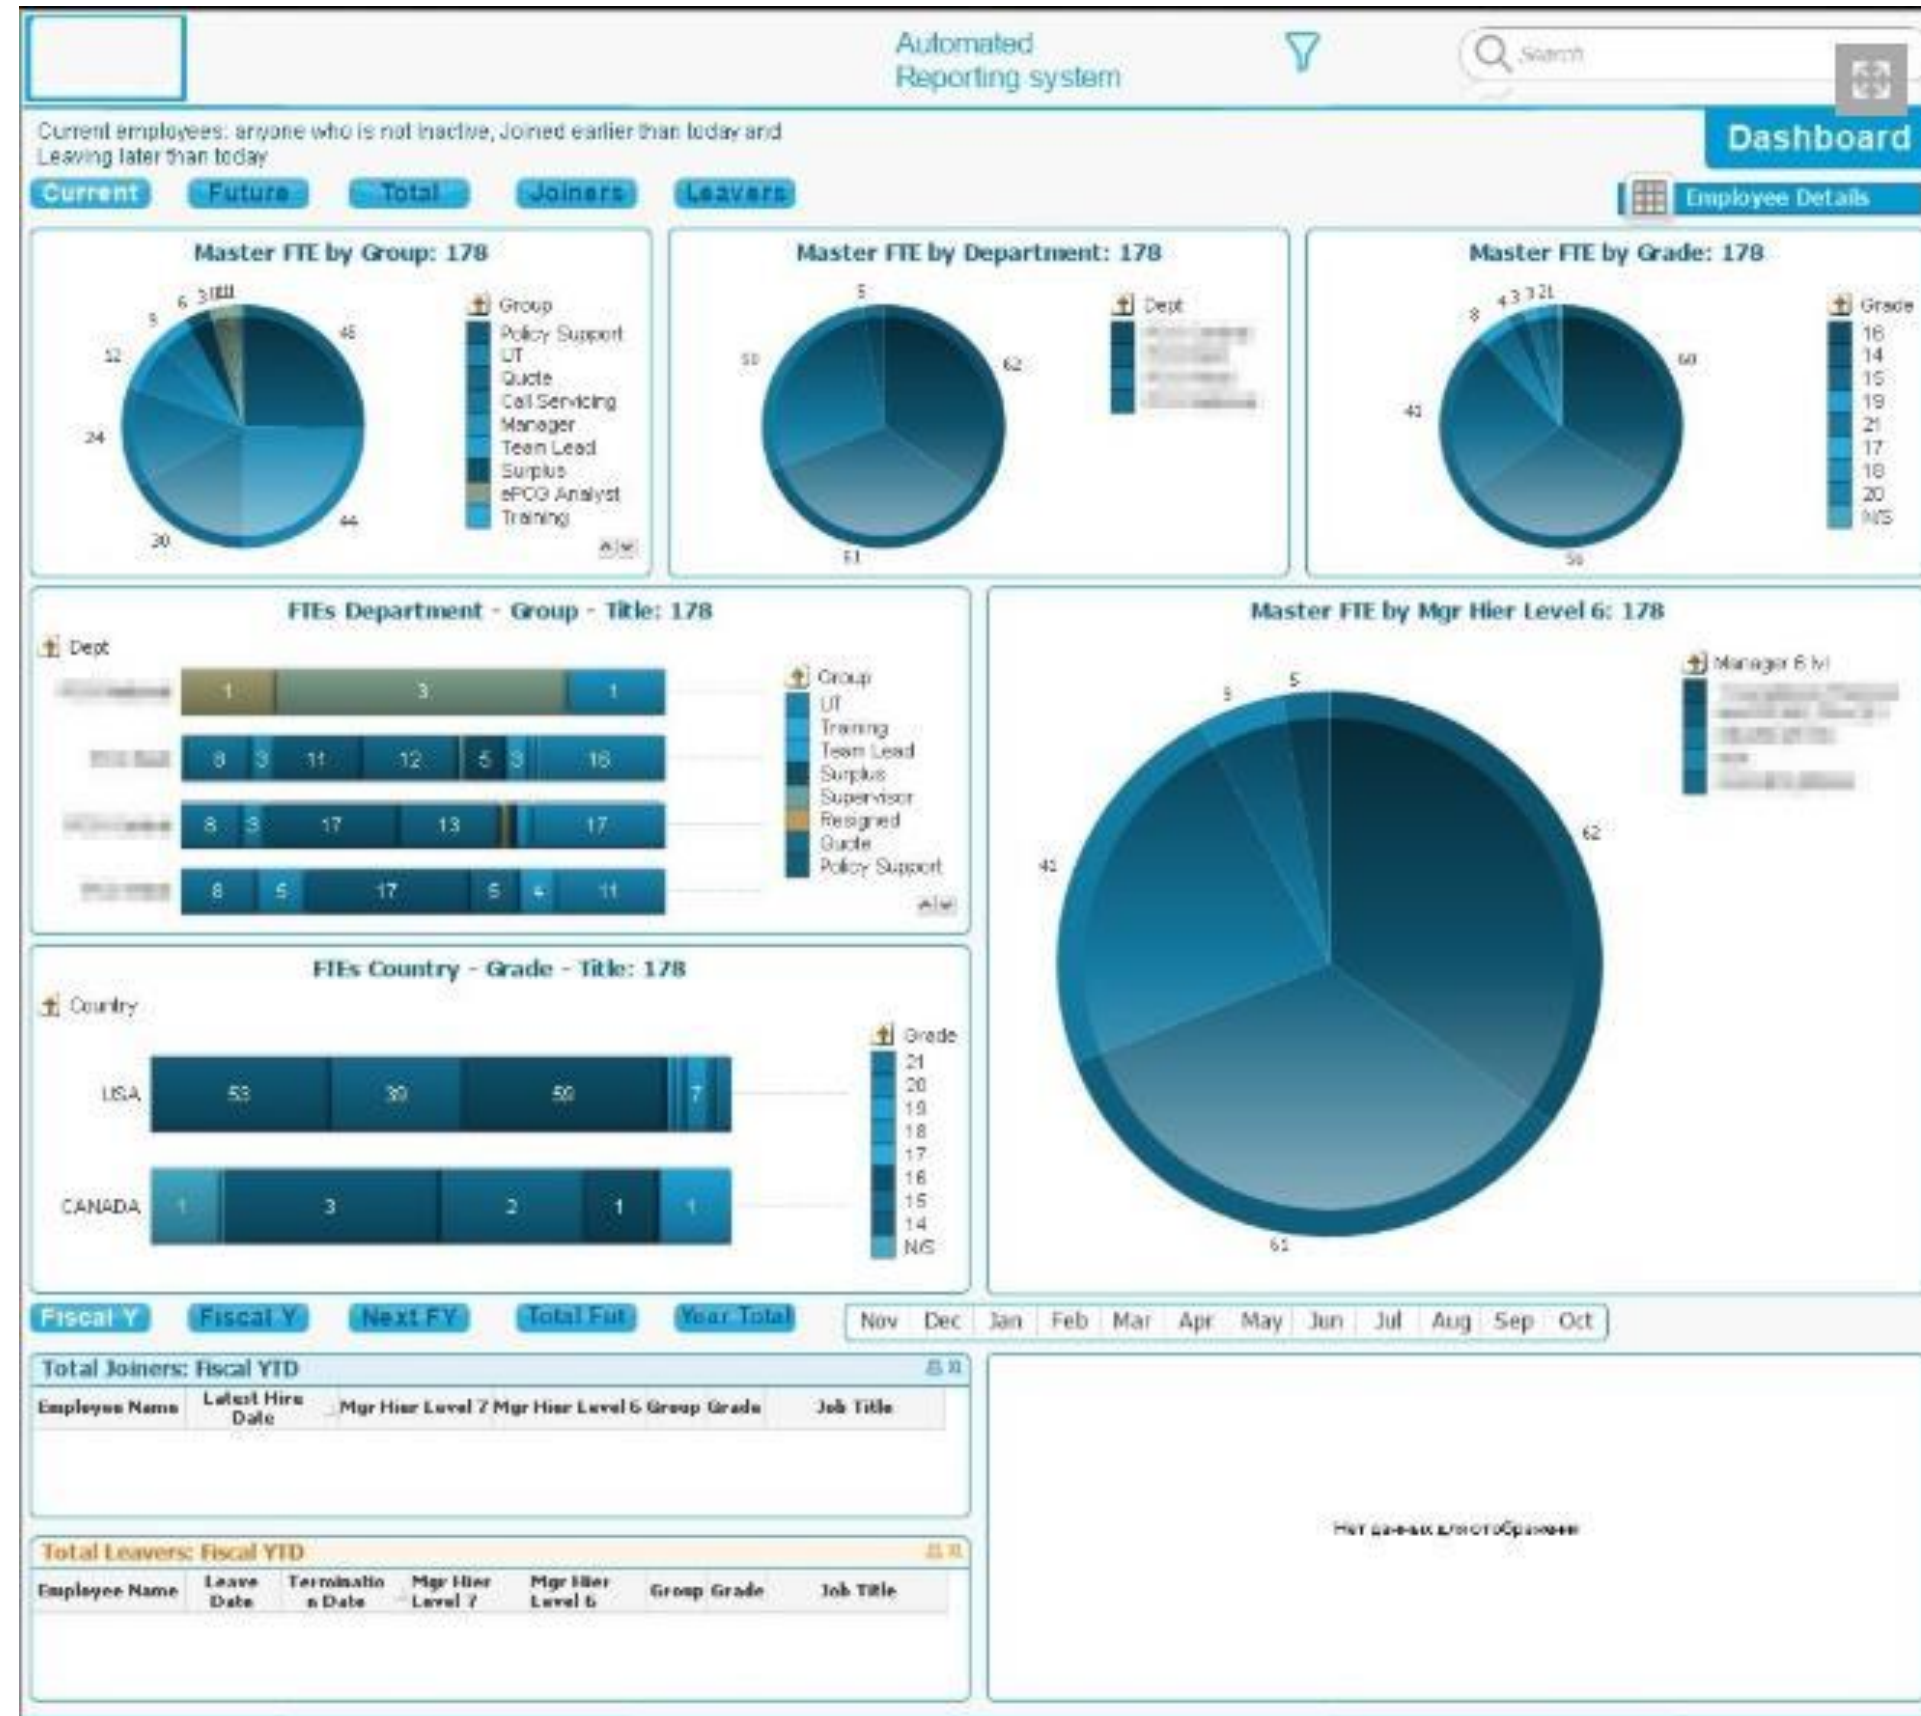

- Real-time user & order metrics with trend indicators  
- Daily & weekly revenue tracking through line charts  
- Breakdown of completed, abandoned, and returned orders   
- Top-selling products and category performance analysis  
- Visual insights into customer search behavior  
- Device usage comparison: desktop vs. mobile  
- Day-over-day trend analysis for key metrics  
- Visitor distribution by global regions

Epicbliss

- **Description:**
 - Developed an ETL pipeline using SSIS in BIDS (Business Intelligence Development Studio).
 - **Data Source:** Excel files used as the primary input.
 - **Back End:** Processed and loaded data into SQL Server 2014 for reporting and analysis.

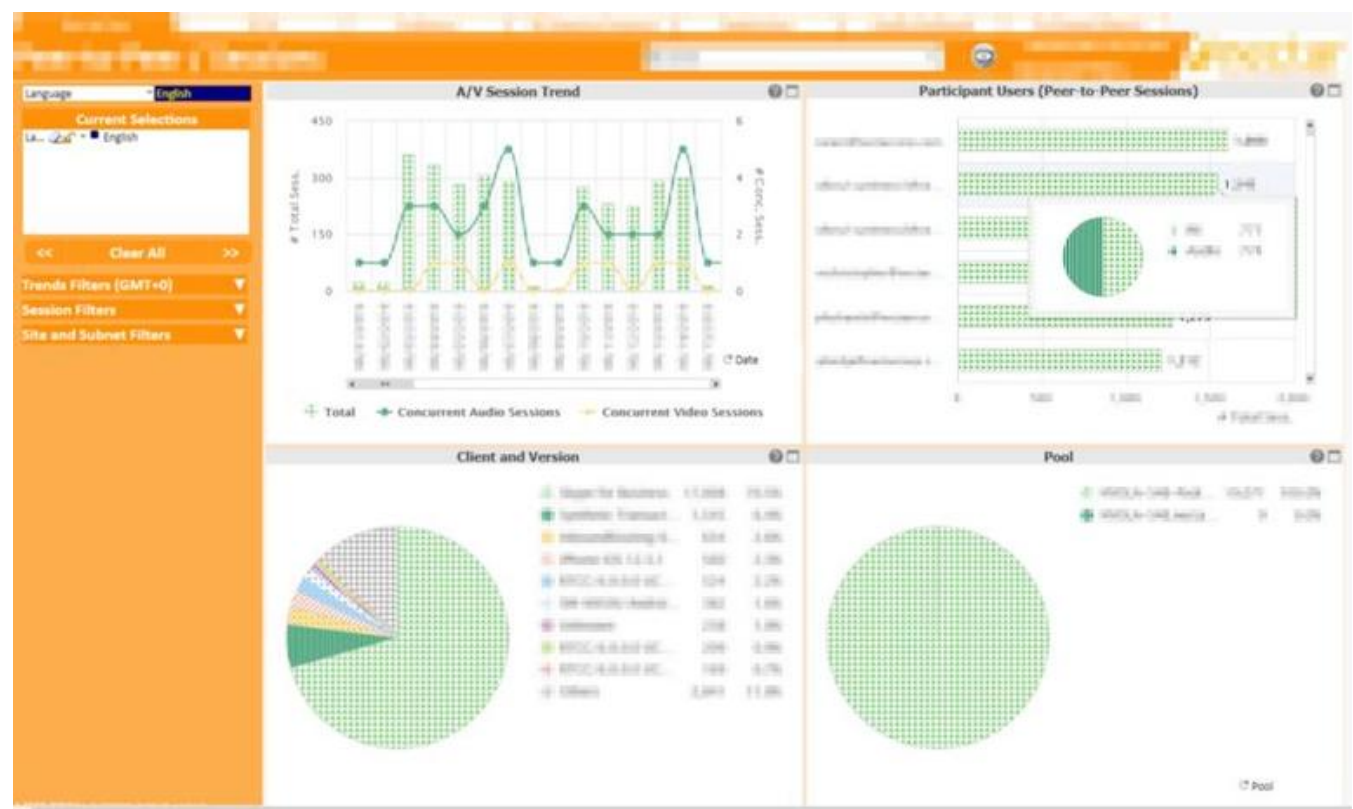

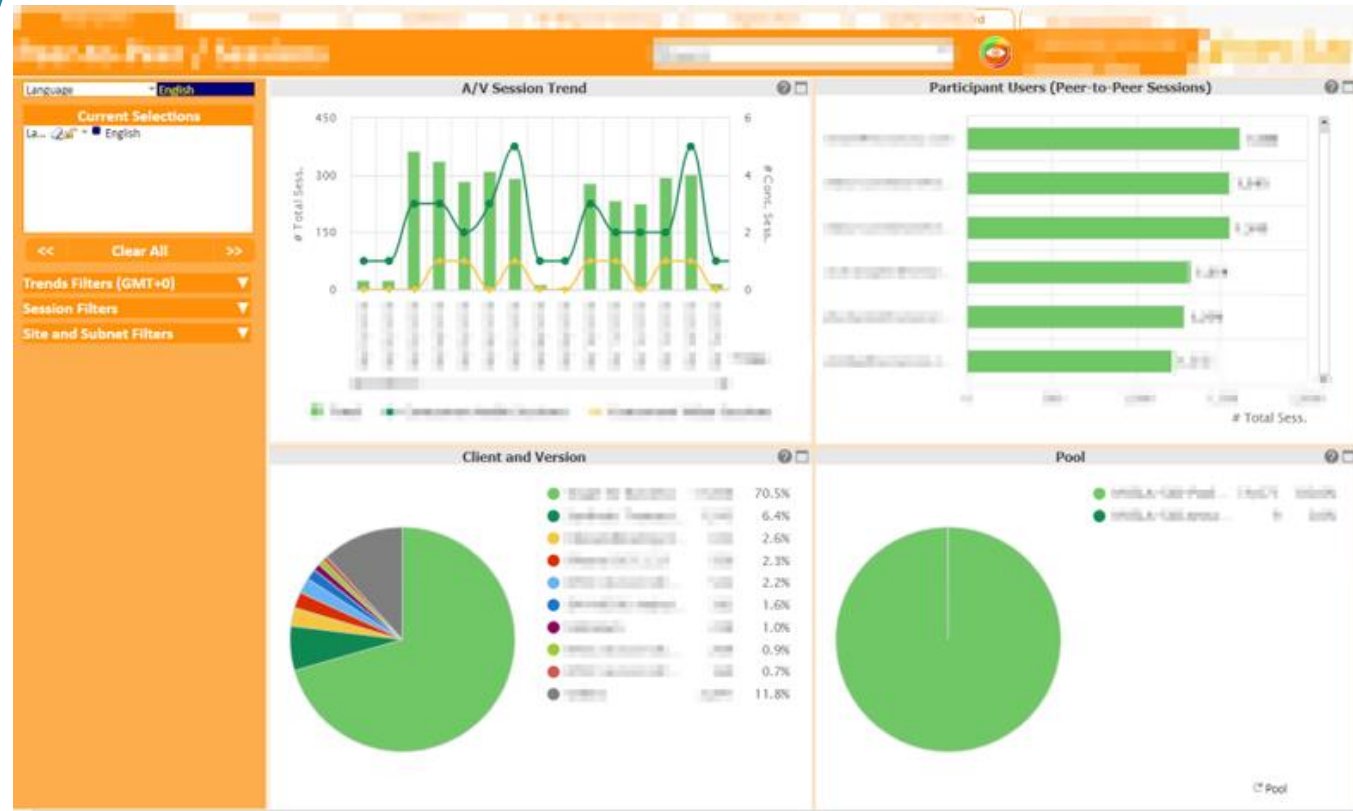

Marketing Project Dashboard – Excel Backend

Description:

- Developed a Marketing Analytics Dashboard with interactive filters, 3D pie charts, bar charts, timelines, and data tables for better insights.
- **Data Source:** Excel used as the backend for storing and processing data.
- Provided visual performance tracking for campaigns and marketing KPIs.

✓ **Result:** Delivered an interactive and insightful dashboard for effective marketing decision-making.

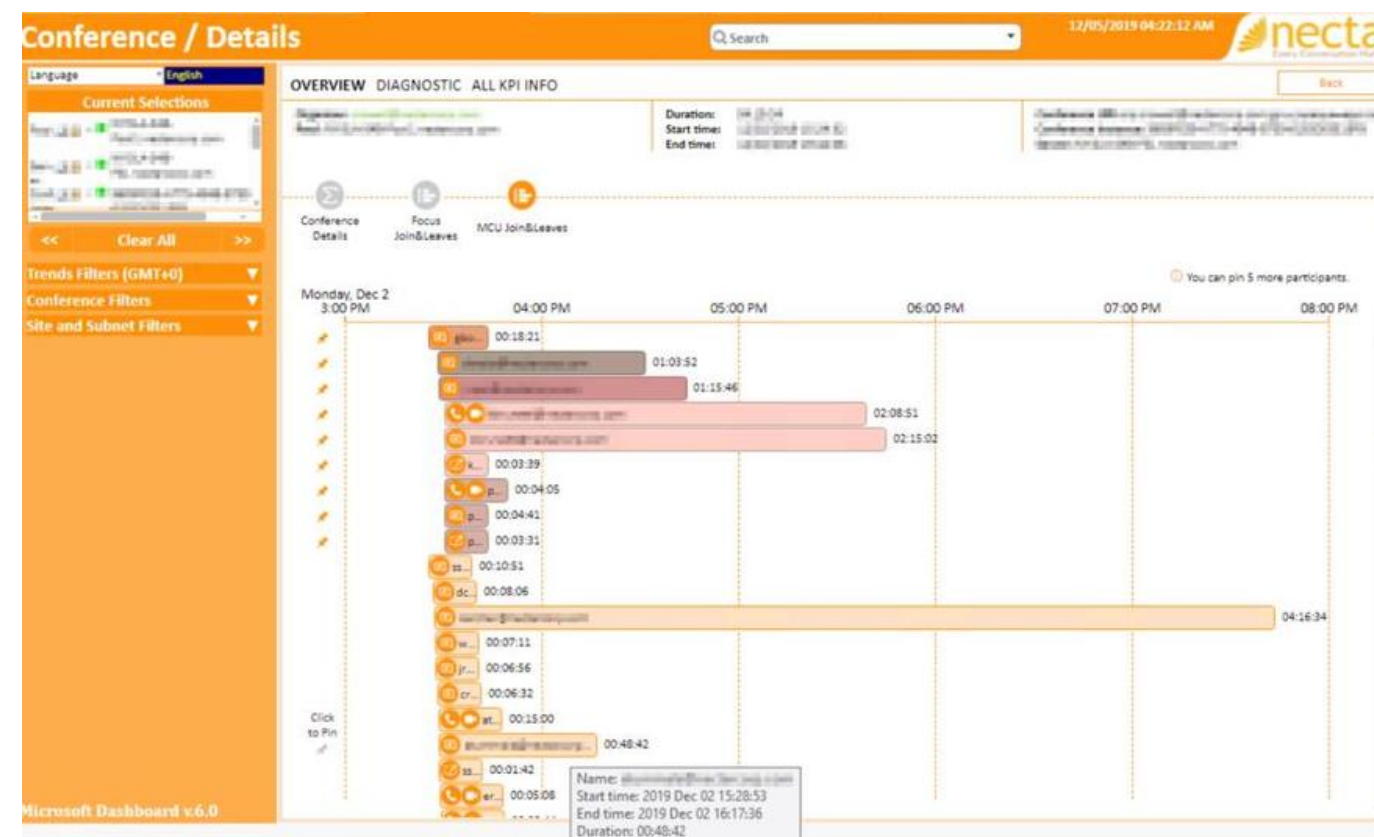

Qlik view Projects Delivered

👁 Vision Session Dashboard – Excel Backend

📌 Description:

- Developed a dashboard to track sessions per user, including filters and a language selection bar.
- Visualizations include bar charts , pie charts , and data tables .
- A colorblind-friendly chart was also created for improved accessibility.
- Data Source: Excel used as the backend for data management and analysis.

- ✓ **Result:** Delivered an accessible and insightful session-tracking dashboard for better user engagement analysis.

Looker – Modern Business Intelligence & Data Analytics

Looker is a cloud-based business intelligence (BI) and data analytics platform that helps organizations explore, visualize, and share real-time insights from their data.

◆ Key Features:

-  **Interactive Dashboards:** Build dynamic and shareable dashboards for decision-making
-  **Data Exploration:** Perform ad-hoc queries without needing complex SQL knowledge
-  **LookML Modeling:** Centralize business logic for consistent metrics across teams
-  **Seamless Integrations:** Connect with cloud databases, warehouses, and embedded analytics
-  **Web-Based Access:** Access dashboards securely from any browser or device

✓ Goal: Empower teams to make data-driven decisions with real-time, visual, and actionable insights.

Client Testimonials

- Real pleasure consulting with Ravi & Team Epicbliss to set up our company's entire SharePoint Intranet and portal. We will definitely be reaching out to team for future work to be done. - **Rachelle Glaccer (USA)**
- Overall Epicbliss delivered quality work. They have top-notch work ethics and a winning attitude. We recognize and appreciate your dedicated efforts. Thank you. - **Stephen Pean (Canada)**
- A+++. Very easy to work with and professional team Epicbliss - **Archie Patterson (Australia)**
- Ravi and team pack in terabytes of SharePoint and BI wisdom :-)
Are very clear in communication and can provide one-stop solution for everything SharePoint, database, data analytics or BI.
Look forward to working with them in future as well.
- **Marco (Germany)**
