Our Expertise

Services We Offer

- **Salesforce Development – Visualforce, Lightning Components (Aura Framework), Apex, Sales Cloud, Service Cloud** **Microsoft Technologies –** SharePoint, Power Automate, Microsoft Flow, Azure, Dynamics 365
- **BI & Analytics Tools –** Power BI, Tableau, Looker, QlikView, Pentaho
- **ETL & Data Integration –** Talend, Informatica, SQL, Pentaho Data Integration (PDI)
- **Mobile App Development –** iOS, Android, Flutter, Swift
- **Oracle Cloud Solutions –** Financials Cloud, Project Portfolio Management, EPM, HCM, CX Cloud, SCM Cloud
- **RPA Technologies –** PAD, Automation Anywhere, UiPath Development

At Epicbliss, our team of **25+ highly** skilled developers brings deep expertise across a wide range of modern technologies,

Our capabilities in Salesforce

At Epicbliss, we harness the full power of Salesforce to streamline customer engagement, optimize operations, and drive intelligent, data-driven growth for organizations across industries.

Our Salesforce Capabilities Include:

- ✔ **End-to-End Salesforce Solutions** – At Epicbliss, we deliver the full spectrum of Salesforce capabilities to build a truly connected digital ecosystem. Our expertise spans:
 - **Marketing Cloud** – Create personalized, cross-channel campaigns (email, SMS, web, social) with automation and segmentation frameworks to drive engagement and ROI.
 - **Sales Cloud** – Empower sales teams with intelligent lead management, opportunity tracking, forecasting, and AI-driven insights to close deals faster.
 - **Service Cloud** – Transform customer support with omnichannel case management, knowledge bases, and AI-powered chatbots for faster resolution and enhanced satisfaction.
 - **Data Cloud** – Unlock real-time customer intelligence by unifying fragmented data sources into a single, actionable view of every customer.
 - **Experience Cloud** – Build branded portals, partner communities, and customer self-service hubs that strengthen collaboration and engagement.
- 👉 **Customer 360 & Personalization** – We unify customer data across touchpoints, enabling personalized journeys, segmentation, and AI-driven engagement that foster loyalty and stronger relationships.
- ⚙️ **Process Automation** – We streamline operations through workflow automation, approvals, and AI-assisted lead/service routing, boosting team efficiency and reducing manual effort.
- 📊 **Advanced Analytics & AI** – Using Einstein AI, Calculated Insights, and predictive modeling, we turn Salesforce data into actionable strategies that drive growth and improve decision-making.
- 🔗 **System Integration** – We connect Salesforce with ERP (NetSuite, SAP), Data Platforms (Snowflake, GCS), and third-party apps, ensuring seamless data flow and a Single Source of Truth (SSOT).
- 🔒 **Security & Governance** – Our solutions enforce granular role-based access, auditing, and compliance, ensuring global data governance while maintaining user productivity.
- 🌐 **Scalable Deployments** – Whether cloud, hybrid, or industry-specific, we deliver Salesforce solutions built for performance, flexibility, and future growth.

IMDEX (Mining Tech)

Description:

Driving the digital transformation journey for a mining technology leader by building a Fast Start MVP leveraging Salesforce Data Cloud, Marketing Cloud Engagement, and Snowflake. Designed intelligent multi-phase customer journeys, advanced insights, and secure data pipelines to enable scalable, personalised engagement and measurable business impact.

Responsibilities:

- Built Fast Start MVP with Salesforce Data Cloud, Marketing Cloud Engagement, and Snowflake.
- Delivered multi-phase journeys including New Lead Onboarding, Product Inquiry, Event Registration and Dormant Lead reactivation.
- Designed Calculated Insights (CI) such as Churn Risk, Cross-Sell Propensity, Upsell Readiness, and Customer Lifetime Value.
- Implemented Snowflake Zero-Copy connector strategy with private link security for compliant data sharing.
- Developed Kentico → FTP → Data Cloud → SFMC pipeline for seamless and automated data ingestion.
- Created architecture diagrams, CI design documentation, and detailed DDD for stakeholder alignment.

OuterFactor (B2B Manufacturing)

Description:

Designed and implemented a Salesforce CRM solution for a B2B manufacturing client, focusing on marketing, quoting, deal registration, and order processing. The project integrated Salesforce with NetSuite ERP to automate order-to-cash processes and scale high-volume partner operations efficiently.

Responsibilities:

- Designed Salesforce CRM proposal covering marketing, quoting, deal registration, and order processing.
- Integrated NetSuite ERP with Salesforce CRM to enable seamless order-to-cash automation.
- Delivered partner-centric workflows optimised for high-volume transactions and scalability.
- Improved operational efficiency, partner collaboration, and end-to-end sales cycle management.

Cross-Group (Industrial)

Description:

Implemented an integrated Agentforce, Data Cloud, and Service Cloud solution to strengthen industrial client operations. The project focused on delivering real-time customer insights, AI-driven enrichment, and automated lead routing to accelerate sales and service efficiency.

Responsibilities:

- Implemented Agentforce + Data Cloud + Service Cloud solution for unified customer engagement.
- Built a real-time customer insights pipeline to enable data-driven decision-making.
- Automated sales and service lead routing with AI-based enrichment for faster response times.
- Enhanced customer visibility, operational efficiency, and lead conversion outcomes.
- SubscriberKey Migration, Trigger Journey from Another Journey, IP Warming, and more.
- Metadata-driven AMPscript personalisation.

• Real-time sentiment analysis, RFM-triggered campaigns, Agentforce auto-content.

Artesis (Predictive Maintenance)

Description:

Designed a proof of concept for predictive maintenance by integrating IoT data streams with Salesforce Service Cloud and Agentforce. The solution automated service case creation from real-time alerts and enabled AI-based routing to improve responsiveness and service outcomes.

Responsibilities:

- Designed POC integrating predictive maintenance capabilities with Service Cloud and Agentforce.
- Enabled real-time IoT alerts → Data Cloud → automated service case creation for proactive issue resolution.
- Delivered AI-based service routing through Agentforce to enhance efficiency and accuracy.
- Improved maintenance response times, service team productivity, and customer satisfaction.
- SubscriberKey Migration, Trigger Journey from Another Journey, IP Warming, and more.
- Metadata-driven AMPscript personalization.

SPINS (CPG Data Company)

Description:

Built a Single Source of Truth (SSOT) framework leveraging Salesforce ID to unify disparate systems and deliver accurate, trusted data. The project focused on advanced AI-driven matching, validation workflows, and scalable data pipelines to ensure consistency across enterprise platforms.

Responsibilities:

- Built the SSOT framework using Salesforce ID as the unique identifier.
- Unified multiple systems, including PI, CPL, Destini CSM, MDM, and Satori for centralised data governance.
- Designed AI-based data matching with user-driven validation workflows to ensure data accuracy.
- Planned Snowflake/GCS pipelines for seamless ingestion and scalable integration.
- Strengthened data consistency, governance, and enterprise-wide decision-making.
- SubscriberKey Migration, Trigger Journey from Another Journey, IP Warming, and more.
- Metadata-driven AMPscript personalization.

Digital Libraries & Communities

Description:

Contributed to the Digital Libraries & Communities initiative by leveraging Salesforce Marketing Cloud to build data-driven, personalised customer experiences. The project focused on enhancing engagement through segmentation, personalisation, and seamless Salesforce integration.

Responsibilities:

- Implemented Salesforce Marketing Cloud solutions, including MC Personalisation, Data Cloud, and Ad Studio.
- Designed and executed cross-channel segmentation frameworks to improve targeted customer engagement.
- Delivered personalised web experiences integrated with Salesforce, enhancing user journeys and digital adoption.
- Achieved measurable improvements in multi-channel campaign effectiveness and engagement rates.

Healthcare SaaS

Description:

Worked on a Healthcare SaaS initiative leveraging Salesforce Marketing Cloud, Data Cloud, and Einstein AI to deliver predictive personalisation and automated patient engagement. The project aimed to improve healthcare communication, streamline campaigns, and measure ROI effectively.

Responsibilities:

- Integrated Data Cloud, Salesforce Marketing Cloud, and Einstein AI to enable predictive personalisation.
- Automated multi-channel patient engagement workflows to improve outreach and care journeys.
- Built reporting dashboards to track and analyse campaign ROI with actionable insights.
- Enhanced patient experience and achieved significant improvements in engagement efficiency and campaign performance.
- SubscriberKey Migration, Trigger Journey from Another Journey, IP Warming, and more.
- Metadata-driven AMPscript personalization.

E-Commerce

Description:

Led digital transformation initiatives for retail and B2B/B2C clients by integrating Salesforce Marketing Cloud, Pardot, and Sales Cloud. The project focused on optimising lead management, automating customer journeys, and delivering seamless brand experiences across channels.

Responsibilities:

- Integrated SFMC, Pardot, and Sales Cloud to unify retail and B2B/B2C marketing efforts.
- Implemented lead scoring, nurturing, and cross-channel automation to drive conversions.
- Delivered consistent, personalised customer experiences across multiple brands.

Wine & Retail E-Commerce

Description:

Architected an omnichannel Salesforce Marketing Cloud solution for a global wine distributor, enabling data-driven engagement across multiple customer touchpoints. The project emphasised advanced segmentation, lifecycle automation, and personalised campaigns to strengthen brand loyalty and sales.

Responsibilities:

- Architected an omnichannel Salesforce Marketing Cloud solution to unify global retail operations.
- Designed robust data architecture supporting advanced segmentation and customer insights.
- Implemented lifecycle campaigns including onboarding, upsell, and re-engagement journeys.

Manufacturing & Automotive

Description:

Delivered Salesforce Marketing Cloud and Data Cloud integration for a global manufacturing and automotive client, enabling intelligent lead routing and personalised engagement. The project focused on automation, compliance, and scalable data governance across multiple regions.

Responsibilities:

- Integrated Salesforce Marketing Cloud with Data Cloud to streamline lead routing and activation.
- Implemented dynamic personalised campaigns leveraging Data Cloud for real-time engagement.
- Ensured global data compliance and governance, aligning with regional regulations.

Client Testimonials

- Real pleasure consulting with Ravi & Team Epicbliss to set up our company's entire SharePoint Intranet and portal. We will definitely be reaching out to team for future work to be done. - **Rachelle Glaccer (USA)**
- Overall Epicbliss delivered quality work. They have top-notch work ethics and a winning attitude. We recognize and appreciate your dedicated efforts. Thank you. - **Stephen Pean (Canada)**
- A+++. Very easy to work with and professional team Epicbliss - **Archie Patterson (Australia)**
- Ravi and team pack in terabytes of SharePoint and BI wisdom :-)
Are very clear in communication and can provide one-stop solution for everything SharePoint, database, data analytics or BI.
Look forward to working with them in future as well.
- **Marco (Germany)**
