Our Expertise

Services We Offer

- **Microsoft Technologies** – SharePoint, Power Automate, Microsoft Flow, Azure, Dynamics 365
- **BI & Analytics Tools** – Power BI, Tableau, Looker, QlikView, Pentaho
- **ETL & Data Integration** – Talend, Informatica, SQL, Pentaho Data Integration (PDI)
- **Salesforce Development** – Visualforce, Lightning Components (Aura Framework), Apex, Sales Cloud, Service Cloud
- **Mobile App Development** – iOS, Android, Flutter, Swift
- **Oracle Cloud Solutions** – Financials Cloud, Project Portfolio Management, EPM, HCM, CX Cloud, SCM Cloud
- **RPA Technologies** – PAD, Automation Anywhere, UiPath Development

At Epicbliss, our team of **25+ highly** skilled developers brings deep expertise across a wide range of modern technologies,

Automation Case Studies Using UiPath

Transforming Banking, Finance & Insurance with UiPath Automation

UiPath has transformed the Banking, Financial Services, and Insurance (BFSI) sector by automating repetitive and time-consuming processes. From loan processing and customer onboarding to policy administration and claims management, RPA helps institutions streamline operations, reduce errors, and deliver services faster.

It also strengthens compliance and risk management. Bots can automatically collect, validate, and process regulatory data, ensuring timely reporting and adherence to KYC, AML, and other requirements. This minimizes errors, reduces regulatory risks, and keeps organizations audit-ready.

Beyond efficiency and compliance, UiPath enhances the customer experience. Automated workflows speed up loan approvals, claims, and policy issuance, while freeing employees to focus on high-value tasks. This combination of accuracy, speed, and improved service helps BFSI organizations stay competitive in a digital market.

IBR Mainframe Automation

Background of the Project Delivered

- Manual inter-bank reconciliation process in mainframe was slow and highly error-prone.
- It required extensive manual effort from the banking team.
- High processing time caused delays in daily operations.
- Frequent mistakes increased operational risks and inefficiencies.

Solution

- UiPath automated login, data extraction, and reconciliation using terminal automation.
- Bots handled repetitive tasks, reducing human intervention.
- Exception reports were generated automatically for review.
- Reports were emailed directly to stakeholders, ensuring timely action.

Benefits

- Processing became 80–90% faster compared to manual methods.
- Manual errors were completely eliminated.
- Compliance was improved and regulatory risks reduced.
- Significant cost savings and operational efficiency were achieved.

HFM Loading & Consolidation Automation

Background of the Project Delivered

- Manual data load and consolidation in Hyperion was slow and time-consuming.
- Frequent delays impacted timely reporting and decision-making.
- The process required significant manual effort from finance teams.
- Errors in manual consolidation increased operational and compliance risks.

Solution

- BOTs automated data validation and loading into HFM seamlessly.
- Consolidation was triggered automatically, reducing manual intervention.
- Reports were extracted and generated without delays.
- The entire workflow ensured accuracy and faster reporting cycles.

Benefits

- Closing cycles became 70–80% faster than manual processing.
- Manual errors were completely eliminated, improving data integrity.
- Compliance with financial reporting standards was enhanced.
- Overall productivity and operational efficiency were significantly improved.

SAP Revaluation (Reval) Automation

Background of the Project Delivered

- Manual SAP Reval runs for foreign currency balances were time-consuming and error-prone.
- Delays in execution impacted the financial close process.
- The process required significant manual effort from finance teams.
- Errors increased compliance risks and operational inefficiencies.

Solution

- BOTs automated SAP GUI navigation, reval execution, report download, and reconciliation.
- Manual intervention was minimized, ensuring consistent execution.
- Reports were generated and reconciled automatically.
- The workflow streamlined the end-to-end revaluation process with accuracy.

Benefits

- Execution became 70–85% faster than manual processing.
- Manual errors were completely eliminated, ensuring 100% accuracy.
- Compliance risks were reduced and regulatory adherence improved.
- Dependence on FTEs was lowered, boosting operational efficiency.

Hyperion SOX Compliance Automation

Background of the Project Delivered

- Manual SOX checks in Hyperion, including access, logs, and audit evidence, were time-consuming and error-prone.
- The process required extensive manual effort from finance and audit teams.
- Delays in validation impacted timely compliance reporting.
- Errors increased risk of regulatory non-compliance and operational inefficiency.

Solution

- BOTs automatically extracted access logs and validated them against the SOX matrix.
- Audit-ready reports were generated without manual intervention.
- The process ensured consistent and accurate compliance checks.
- Automation streamlined the end-to-end SOX validation workflow efficiently.

Benefits

- Compliance checks became 60–75% faster than manual methods.
- Manual errors were eliminated, ensuring error-free validations.
- Stronger internal controls were established across systems.
- Operational costs were reduced while improving regulatory adherence.

Client Testimonials

- Real pleasure consulting with Ravi & Team Epicbliss to set up our company's entire SharePoint Intranet and portal. We will definitely be reaching out to team for future work to be done. - **Rachelle Glaccer (USA)**
- Overall Epicbliss delivered quality work. They have top-notch work ethics and a winning attitude. We recognize and appreciate your dedicated efforts. Thank you. - **Stephen Pean (Canada)**
- A+++. Very easy to work with and professional team Epicbliss - **Archie Patterson (Australia)**
- Ravi and team pack in terabytes of SharePoint and BI wisdom :-)
Are very clear in communication and can provide one-stop solution for everything SharePoint, database, data analytics or BI.
Look forward to working with them in future as well.
- **Marco (Germany)**
