Power Automate Projects Delivered

Power Automate Projects

We have expertise working on Power Automate projects.

Project 1 : Invoice Generation and Approval

Automation into the Process of Voucher creation and invoicing as well as the multiple layers of the Approvals are also there. And after closing the Approvals we have the Archive process as well. Also, we have created the reminder flows which will send you the reminder email notifications when the user starts their day

Responsibilities:

- SharePoint list for the Voucher creation and log.
- Based on the data into the Voucher list we are creating the Invoice Dynamically based on the specified template.
- Approval process which will be for multiple users and back and forth process for the Rejection scenarios as well.
- SharePoint document libraries to store the documents into it in Organized way so that we can have them whenever we need

Power Automate Projects Delivered

Project 2 : Project Report generation

Client needs were to get task assignment and daily reminder for the pending and due tasks into the Organizations and the PM as well as the Higher-level Org. managers are not able to easily track that critical task. So, we have built one reporting reminder system using the Power Automate which will give the Summary in the Email for the Pending, Due as well as upcoming tasks into the daily email notifications as per the user's role and assigned Project/Tasks/Resources. Also, we are generating the Monthly Reports based on the various criteria.

Responsibilities:

- SharePoint list structure which provides the easy end user experience to enter the data as well as maintain the data.
- OOTB dashboards which will show the personalized tasks and Project related information which has been assigned to the User.
- Get the data from the SharePoint list based on the users and consolidate them before sending into the Email.
- Generate the Reports on Monthly basis as per the business process of the Organization.

Project 3 : Leave Approval

- Project that delivered was Leave approval.
- Employees apply leave and manager are notified.
- Once manager approves the leave, leaves are decreased from the Employees leave balance.
- Different type of leaves will have different deductions from Leave balance.

Save Flow checker Test

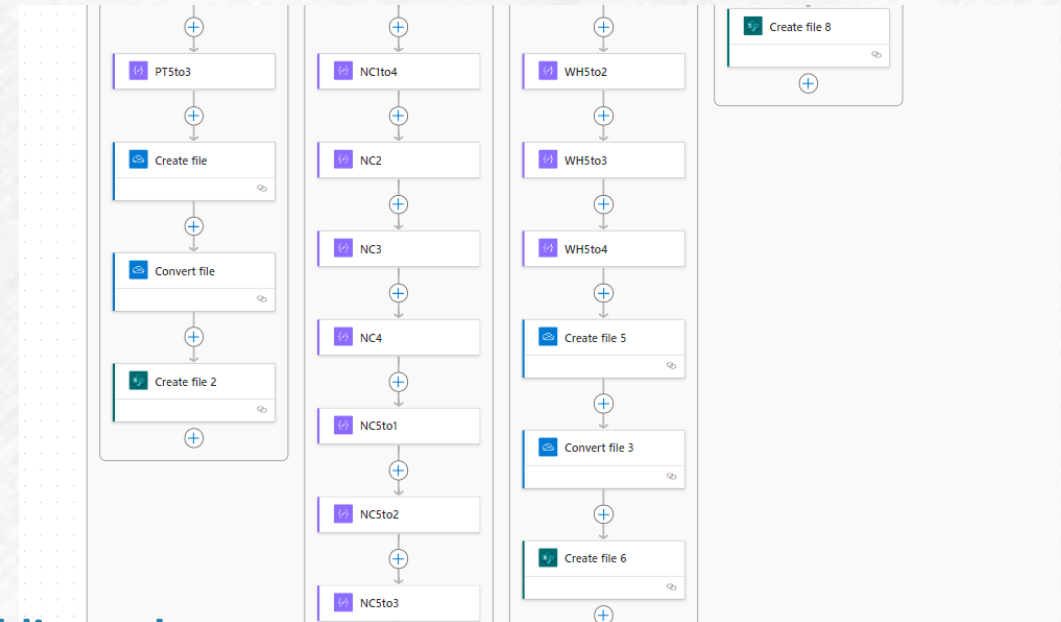

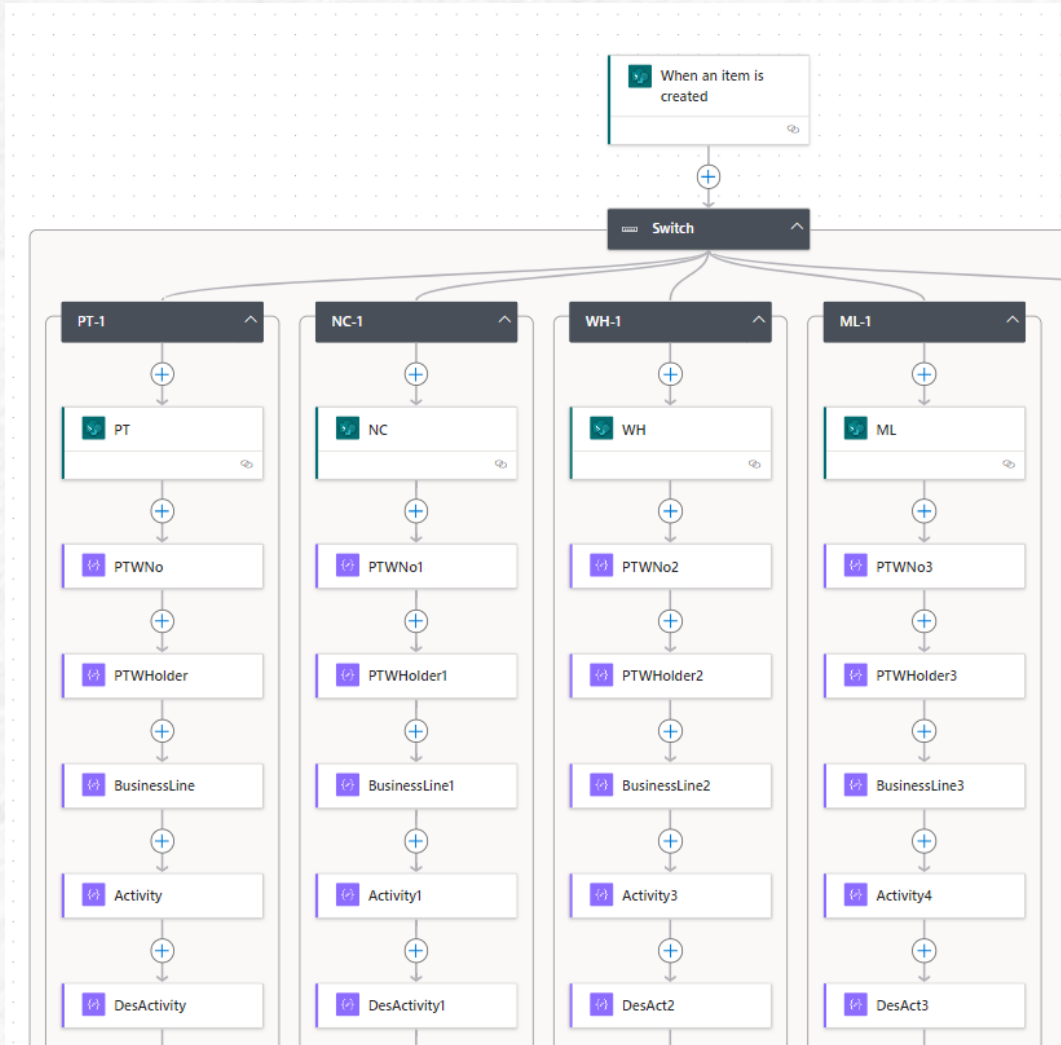

Project 4 : MS forms to SharePoint

- Client need was to store data of MS forms in SP list with customizations.
- We fetched the data of form and stored in SP list with unique reference number as we have in this requirement.
- We fetched data from forms and stored in SP list, such as attachments, unique numbers, date , and other information

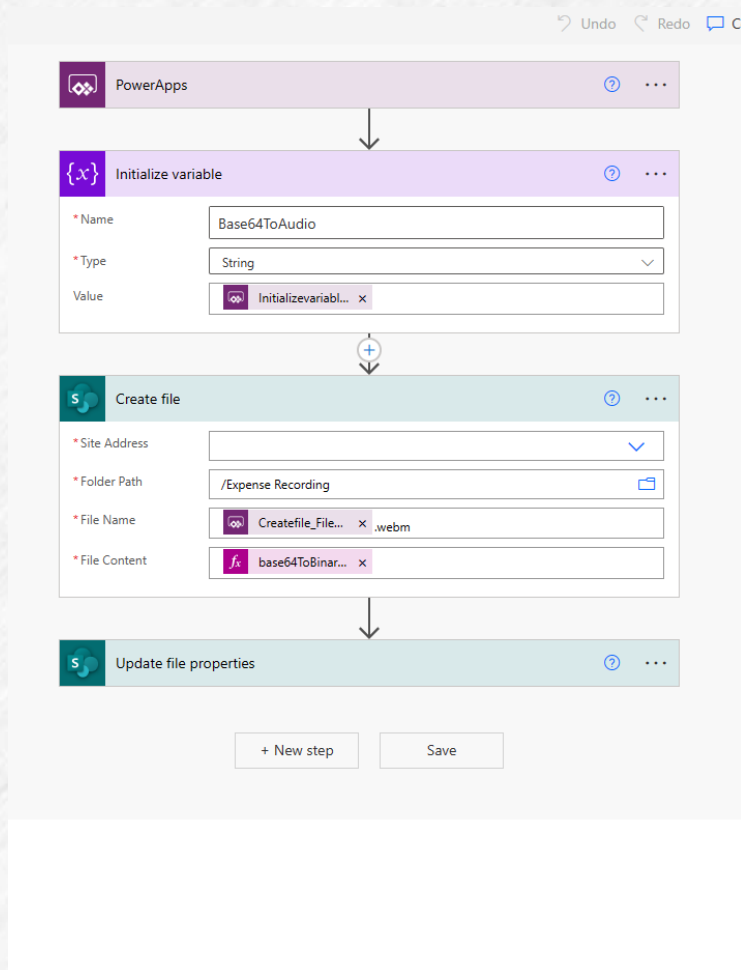

Power Automate Projects Delivered

Project 5 : PowerApps to PDF

- Client requirements was to Convert the PowerApps form into pdf.
- For this we created a document library in SharePoint and appended it with flow to save the PDF.
- For is we have used the html Installed the file in the Onedrive and later on converted that same html file into word and pdf.

Power Automate Projects Delivered

Project 6 : Website Automation using RPA

- Client requirements was to Record the live meeting from power apps and in Sharepoint save
- For this we created a document library in SharePoint and appended it with flow to save the recordings
- We converted the audio into a string file and then later on converted into webm file format as there were some limitations In challenges for this particular task.

Power Automate Projects Delivered

The screenshot shows a Power Automate flow with the following steps:

- When a new response is submitted** (Form icon):
 - Form Id: Quiz
- Apply to each** (Loop icon):
 - Select an output from previous steps: List of respons... x
- Get response details** (Form icon):
 - Form Id: Quiz
 - Response Id: List of respons... x
- Create item** (SharePoint icon)

At the bottom, there is a button labeled "Add an action" and two buttons: "+ New step" and "Save".

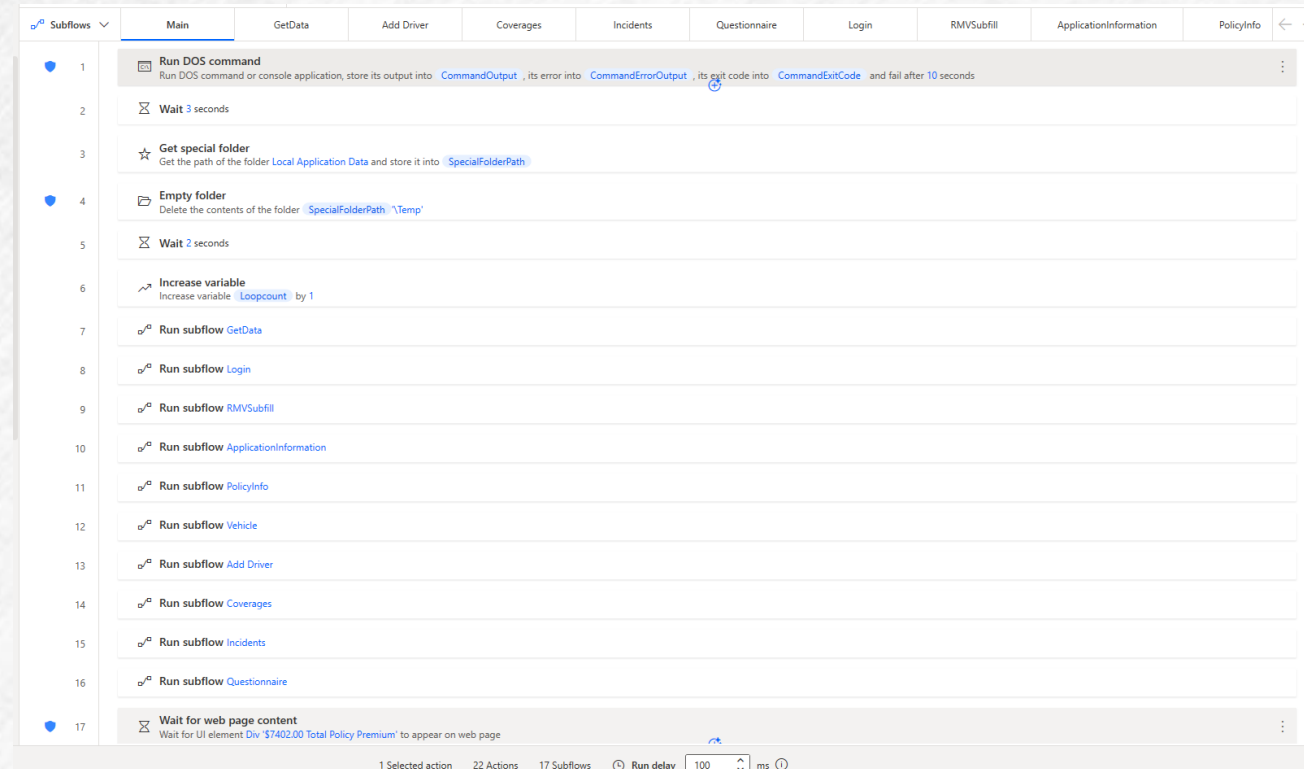

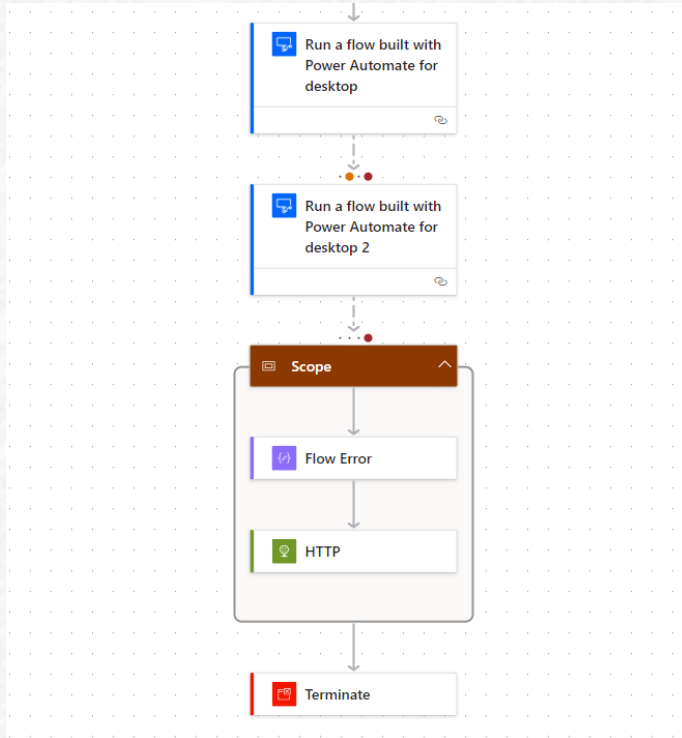

Project 7 : Quiz Forms to SharePoint

- Client requirements for us to store quiz related questions from MS Forms into SharePoint .
- We fetched the data of form and stored in SP list.
- The quiz had different questions and sections based on which we needed to store the data into the sharepoint list.

Power Automate Projects Delivered

Project 8 : Website Automation using RPA

- Client requirements was to create a cloud flow from which we are Triggering the desktop flow.
- Here we have API triggered which is http action also we have vm's used inside this flow
- This flows are triggered is known the Api's of the website

Client Testimonials

Real pleasure consulting with Ravi & Team Epicbliss to set up our company's entire Sharepoint intranet and portal. We will definitely be reaching out to team for future work to be done. - Rachelle Glaccer **(USA)**

Ravi is a great guy with excellent skills and good communication. We recommend Ravi to everyone.

Overall Epicbliss delivered quality work. They have top-notch work ethics and a winning attitude. We recognize and appreciate your dedicated efforts. Thank you. - Stephen Pean **(Canada)**

Ravi is one of the top rate experts in Upwork. We are very satisfied his attitude and product quality."

Ravi completed his task in short time and very accurate. I had almost no issues during testing. He recommended using other technologies than initially designed, his recommendation saved us time and budget. I recommend him and will hire him in my next project.
